@Yahya305 /yahya-salman-37aa29263/

SKILLS

- **Frameworks:** React/Next JS, React Native, Node/Express JS, Nest JS, LangChain
- **Cloud & DevOps:** AWS, Docker, Jenkins
- **Languages:** JavaScript / TypeScript, Golang, Java, Python
- **Databases:** Postgre SQL, SQL, MongoDB, ScyllaDB
- **Project Management Tools:** Jira, Clickup, Slack
- **Version Control:** Git & Github

EXPERIENCE

- **Software Engineer & Technical Consultant | Bitrupt** (Dec 2025 - Present)
  - Engineered scalable cross-platform mobile applications using React Native and backend-heavy full-stack architectures. Designed and implemented AI-powered agentic solutions, automation workflows, and API-driven systems while working directly with clients to gather requirements, define technical roadmaps, and deliver business-focused solutions across multiple projects.
- **Full Stack Developer | IANCON** (June 2022 - Dec 2025)
  - Developed and designed scalable dashboards and applications, primarily in FinTech. Integrated RBAC, payment gateways, and AI-powered automation workflows while collaborating closely with clients to understand requirements, identify problems, and deliver tailored solutions.

PROJECTS

- **Membership Sales Coach:** Developed an AI-powered sales coaching platform using Retrieval-Augmented Generation (RAG) to train users on membership sales methodologies through a structured knowledge base. Implemented hallucination guardrails, contextual summarization, and source-grounded response generation with citation support to ensure accurate, reliable, and explainable coaching interactions.
- **Helion:** An advanced conversational AI agent featuring persistent memory, web search, weather tools, and real-time streaming responses powered by LangGraph.
- **StreamApp:** A high-performance architecture featuring resumable direct-to-storage uploads (Cloudflare R2), adaptive bitrate streaming (HLS) via FFmpeg transcoding, and non-blocking real-time progress tracking using Redis and Server-Sent Events.
- **AI Resume Analyzer:** An NLP-based tool to parse resumes, extract and cluster keywords, and provide recommendations, predictions, and analytics to applicants based on keyword matching.
- **Sketcha:** An intelligent architectural diagramming agent that transforms natural language into complex technical visualizations (UML, Flowcharts). Features iterative "context-aware" design modification, persistent library management, and a premium Next.js interface.

- **AI Fake News Detector:** An AI model to classify news articles as real or fake, helping media outlets and social media platforms improve content moderation and reduce the spread of misinformation.
- **Marketplace Admin Panel:** Designed an admin panel for a finance/ business platform with interactive data visualizations, advanced graph-based insights, sub-user management, and intuitive administrative controls.

EDUCATION

- University Of Karachi | UBIT | BSCS (Jan '22 - Dec '25)
- DJ Sindh Govt. Science College (2019 – 2021)
- Army Public School & Colleges System 2019

ACHIEVEMENTS / HOBBIES

- **Certificate in Chatbot Development:** Awarded by Microsoft Learn Student Ambassadors (MLSA) for creating an intelligent chatbot using Dialogflow.
- **Chess:** Enjoy strategizing and improving problem-solving skills through chess.
- **Blogging:** Passionate about sharing knowledge and experiences, particularly on software development and technology.
