PROFESSIONAL SUMMARY

Full Stack Software Engineer with 4+ years of experience building scalable web and cross-platform mobile applications across the FinTech and AI domains. Skilled in React, Next.js, React Native, and Node.js, with hands-on expertise designing AI-powered agentic systems, Retrieval-Augmented Generation (RAG) pipelines, and automation workflows using LangChain and LangGraph. Proven ability to work directly with clients to gather requirements, define technical roadmaps, and deliver business-focused solutions end to end.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Golang, Java, Python
Frameworks & Libraries: React, Next.js, React Native, Node.js, Express.js, NestJS, LangChain, LangGraph
AI / ML: Retrieval-Augmented Generation (RAG), NLP, LLM Agents, Prompt Engineering, AI Automation
Cloud & DevOps: AWS, Docker, Jenkins, CI/CD
Databases: PostgreSQL, SQL, MongoDB, ScyllaDB, Redis
Tools & Practices: Git, GitHub, Jira, ClickUp, Slack, REST APIs, Agile

PROFESSIONAL EXPERIENCE

Software Engineer & Technical Consultant | Bitrupt *Dec 2025 – Present*

- Engineer scalable cross-platform mobile applications using React Native alongside backend-heavy full-stack architectures.
- Design and implement AI-powered agentic solutions, automation workflows, and API-driven systems for diverse client needs.
- Partner directly with clients to gather requirements, define technical roadmaps, and deliver business-focused solutions across multiple projects.

Full Stack Developer | IANCON *Jun 2022 – Dec 2025*

- Developed and designed scalable dashboards and applications, primarily within the FinTech sector.
- Integrated role-based access control (RBAC), payment gateways, and AI-powered automation workflows.
- Collaborated closely with clients to identify problems, refine requirements, and deliver tailored, production-ready solutions.

KEY PROJECTS

- **Membership Sales Coach:** Built an AI-powered sales coaching platform using Retrieval-Augmented Generation (RAG) to train users on membership sales methodologies via a structured knowledge base. Implemented hallucination guardrails, contextual summarization that reduced LLM token usage and API cost by ~40% per conversation, and source-grounded responses with citation support for accurate, explainable coaching.
- **Helion:** Developed an advanced conversational AI agent with persistent memory, web search, weather tools, and real-time streaming responses powered by LangGraph.
- **StreamApp:** Architected a high-performance video pipeline with resumable direct-to-storage uploads (Cloudflare R2), adaptive bitrate streaming (HLS) via FFmpeg transcoding that cut video start-up and buffering time by ~35% on low-bandwidth connections, and non-blocking real-time progress tracking using Redis and Server-Sent Events.
- **Sketcha:** Created an intelligent architectural diagramming agent that converts natural language into technical visualizations (UML, flowcharts), featuring context-aware iterative design modification, persistent library management, and a polished Next.js interface.
- **AI Resume Analyzer:** Engineered an NLP-based tool to parse resumes, extract and cluster keywords, and deliver recommendations, predictions, and analytics through keyword matching.
- **AI Fake News Detector:** Trained an AI model to classify news articles as real or fake, supporting content moderation and reducing the spread of misinformation.
- **Marketplace Admin Panel:** Designed an admin panel for a finance/business platform with interactive data visualizations, graph-based insights, sub-user management, and intuitive administrative controls.

EDUCATION

- **BS in Computer Science (BSCS)** — University of Karachi (UBIT), Jan 2022 – Dec 2025
- **Pre-Engineering** — DJ Sindh Govt. Science College, 2019 – 2021

CERTIFICATIONS & ACHIEVEMENTS

- **Certificate in Chatbot Development** — Microsoft Learn Student Ambassadors (MLSA), awarded for building an intelligent chatbot using Dialogflow.
- Active technical blogger sharing knowledge on software development and emerging technologies.
- Competitive chess player, applying strategic thinking and structured problem-solving.
